PROFESSIONAL SUMMARY

Senior Full Stack Developer with 7+ years of experience building scalable web applications and 4+ years leading development teams. Advanced proficiency in JavaScript ecosystem (Vanilla JS, Vue, Node) and Go, with proven track record of delivering complex projects from conception to deployment. Successfully led a team of 5 developers and architected complete business solutions including mobile and web applications.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, Vue2, Vue3, HTML, CSS, Pinia, Vuex, Vite, Vitest
Backend: Go (Golang), Node, Python, MongoDB, mySQL
Architecture: Hexagonal Architecture, Domain-Driven Design (DDD), Microservices
Mobile: Ionic, Capacitor, framework7
Testing: Jest, Vitest
DevOps: GitLab CI/CD, Bash Scripts, Docker
Tools: Git, Vim

PROFESSIONAL EXPERIENCE

Frontend Developer & Team Leader | *EXTE (formerly SunMedia) | July 2021 - Present*

- **Led a team of 5 developers** in building SunStudio, a Figma-like web ad creation platform
- **Architected project structure** and selected technology stack, improving development cycles, and implement DDD and Hexagonal architecture to ensure scalability and maintainability
- **Implemented CI/CD pipelines** using GitLab, reducing deployment time
- **Delivered technical training** on Vite and GitLab CI to 15+ team members
- **Technologies:** Vue3, Pinia, Vite, Vitest, Python, GitLab CI/CD

Senior Frontend Developer **|** *SunMedia **|** December 2020 - July 2021*

- **Developed data management application** for advertising campaigns
- **Created company's UI component library** used across 8+ internal projects
- **Proposed and implemented performance improvements** increasing app speed by 30%
- **Technologies:** Vue.js, Vuex, Webpack, Jest

Full Stack Developer | *Rapicopia | November 2018 - August 2021*

- **Developed complete frontend application** for customer management system
- **Built RapicopiaApp in Go** - local server application for branch printing and note management
- **Optimized user experience** resulting in 25% reduction in customer processing time
- **Technologies:** Vue.js, Nuxt.js, webpack, Go

Full Stack Developer | *Tribal Consulting | July 2018 - October 2020*

- **Delivered multiple client projects** as full stack developer
- **Developed cross-platform mobile applications** using Ionic
- **Technologies:** Vue.js, Ionic, Node.js, MongoDB, Express.js, Nuxt.js, Webpack

KEY PROJECTS

Hornera - Complete Rental Management System | *Personal Project*

- **Architected and developed end-to-end solution** for temporary rental company
- **Features:** Availability management, cleaning coordination, maintenance scheduling, billing, Booking.com & Airbnb integration
- **Stack:** Go backend, MariaDB, Vue3 frontend, framework7 mobile app
- **Impact:** Automated 90% of manual processes, reduced operational costs by 50%

Event Management Platform | *Freelance | November 2017 - February 2018*

- **Built complete event management system** with real-time updates
- **Technologies:** Ionic, Cordova, Angular.js, Node.js, Express.js, MongoDB

EDUCATION

Information Systems Engineer | *National Technical University - Rosario, Argentina | 2011-2020*

- Focus: Software Engineering, Database Systems, Project Management

LANGUAGES

- **Spanish:** Native
- **English:** Professional (B2)

LEADERSHIP & ACHIEVEMENTS

- **Team Leadership:** Successfully managed 5-person development team with an excellent project delivery rate
- **Technical Training:** Delivered 5+ internal training sessions on modern development practices
- **Process Improvement:** Implemented CI/CD practices reducing deployment errors by 80%
- **Cross-functional Collaboration:** Worked closely with CTO, UX, QA, and product teams on complex projects
- **Problem Solver:** Passionate about finding innovative solutions to complex technical challenges
